

AARAV JIT

ENTRY-LEVEL IT SUPPORT | CYBERSECURITY & NETWORKING STUDENT

Sacramento, CA | (916) 519-6612 | aaravjit16@gmail.com | aaravjit.github.io | github.com/AaravJit | linkedin.com/in/aarav-jit-499a93293

PROFESSIONAL SUMMARY

Cybersecurity and Information Assurance student at American River College with hands-on experience configuring Arch Linux, troubleshooting Windows and Linux systems, building PCs, and automating installs with Bash. Over two years of high-volume customer service with clear communication and disciplined escalation. Project write-ups, code, and screenshots are at aaravjit.github.io.

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Arch Linux, Linux command line, desktop environments, PowerShell fundamentals

Troubleshooting: Software installation, PC hardware, storage and memory diagnostics, user accounts and permissions, processes, services, logs, network connectivity

Networking Fundamentals: TCP/IP, IPv4 addressing, DNS, DHCP, ICMP, Ethernet, Wi-Fi, common ports and protocols

Linux Administration: systemd, journalctl, NetworkManager, package management; Windows Event Viewer, Device Manager, Task Manager

Development: Bash, Python, TypeScript, JavaScript, Next.js, Git, GitHub

PROJECTS

Aarav Hyprland - Portable Arch Linux & Hyprland Environment | github.com/AaravJit/aarav-hyprland 2026

- Built a reusable Bash installation workflow and Git-tracked configuration for deploying a personalized Hyprland environment on Arch Linux.
- Created separate configuration paths for Intel, AMD, and NVIDIA graphics and deployed the environment on a desktop and an HP OmniBook laptop.
- Diagnosed setup issues with systemd and journalctl and documented the setup and troubleshooting steps in the repository.

WrenchAI - Aviation Maintenance Study Platform | wrenchai.app 2025-2026

- Built and deployed an account-based study platform on Base44 with practice questions, mock exams, flashcards, verbal-exam and practical prep, and progress tracking across General, Airframe, and Powerplant subjects.

Pathway - AI-Assisted Resume Tailoring App *In development*

- Building a Next.js and TypeScript app that takes a resume and job posting through fit analysis, tailoring, preview, and download, using OpenAI, Supabase, and Stripe.

Portfolio Website - aaravjit.github.io 2026

- Built a responsive Next.js static site deployed to GitHub Pages through GitHub Actions, with case studies for each project.

EXPERIENCE

Walmart - Online Grocery Pickup Associate | Citrus Heights, CA *Jun 2024-Present*

- Communicate directly with customers to resolve order issues, explain substitutions, and coordinate accurate, timely handoffs in a high-volume environment.
- Use internal inventory and order-management systems and follow documented procedures while priorities change rapidly.
- Identify routine operational problems, coordinate across teams, and escalate issues that need management support.

Target - Seasonal Fulfillment Expert | Sacramento, CA *Nov 2023-Jan 2024*

- Used handheld fulfillment and inventory systems to locate, verify, stage, and prepare orders under tight seasonal deadlines while maintaining order accuracy.

EDUCATION

American River College | Sacramento, CA *Fall 2026-Present*

Cybersecurity and Information Assurance, Associate Degree Program

Coursework: Introduction to Networks; Switching, Routing, and Wireless Essentials; Network Systems Administration; Network Security Fundamentals

California State University, Sacramento *Prior coursework*

Completed Computer Science coursework in programming fundamentals and data structures.
